

I have had the pleasure of working with Dave Gouge of Horizon Assembly Company for the last ten years in support of a mutual customer and have been very happy with that relationship. We have worked closely together to find practical solutions to problems and to incorporate upgrades to projects that minimized the cost and time impacts to the customer and other vendors involved. Dave has adapted equipment to economize processes and worked to help clarify customer needs and prints to make my job easier. As the owner/operator of a small custom sheet metal and machine shop, I feel confident in recommending his services and ideas as a partner in accomplishing a partial or complete project. Please feel free to contact me for further information.
