To whom it may concern,

I would like to offer my highest professional recommendation for Mr. David Gouge who owns and operates Horizon Assembly Company. I have known David for over ten years through my former position as head of engineering and production at Timberline Instruments in Boulder, Colorado.

During that period, may I say that as a small OEM chromatography instruments company, Timberline regularly tapped the many talents offered by our sub-contractors, but none more so than Horizon Assembly Company. Mr. Gouge possesses a keen eye for both quality and product detail, allowing our company to bypass staffing an in-house Quality Assurance department. His ability to proactively spot design problems and offer sound solutions was invaluable to our production team.

I found his determination to deliver a zero-defects product to us to be unmatched among our own staff, and I would not hesitate to use him again in the future. If he chooses, his skills in both electronic and mechanical assembly will keep his services in demand for the foreseeable future.

Feel free to contact me with any questions.

Sincerely,

Sam Azlein, President
SofTA Corporation
