To whom it may concern:

I am pleased to present a character and professional reference for Mr. David Gouge, owner/operator of Horizon Assembly Company.

While employed as a production engineer by Timing Solutions Corporation (TSC) in Boulder, Colorado, I had an opportunity to work very closely with Mr. Gouge for about two years (2000-2002). David provided electronic contract manufacturing services for TSC during my time there and for several years prior to my hiring. During my tenure with TSC, I became quite familiar with David's character, work ethic, quality of work, flexibility and commitment to the customer's needs.

I have found David to always be a consummate professional relative to his interactions with TSC's management and other TSC employees. He frequently provided technical assistance to me at no charge, as well as TSC electro-mechanical assemblers and other staff members.

David was always very responsive to TSC's schedule requirements, oftentimes working nights and weekends to meet customer requirements. In my professional opinion, David's involvement with TSC has contributed greatly to the success TSC enjoys today.

I was quite impressed with David's quality of work. I have extensive experience with aerospace, military, and industrial soldering standards/specifications, and have found David's work to be consistently of the highest quality. David possesses something that seems to be largely lost in today's work environment—pride in his workmanship.

If you should have any questions or desire additional information regarding my association with Mr. Gouge, please don't hesitate to contact me.

Sincerely,

Alan D. Lundberg
